

Blankotex

Post-spotting powder for stains of ink and colored stains

Blankotex is ideal for all washable textiles and all temperature ranges from 85 - 195 °F. The specific power of oxygen develops its action already from 85 °F due to a bleaching activator which is quickly and easily degradable. At the same time it removes tenacious stains like coffee, tea, red wine, fruit juice, fruit, ketchup, vegetables, grass and other substances.

Blankotex contains enzymes and offers effective stain-removal action also in case of albuminous stains like blood, egg, milk or cacao.

Physico-chemical data:

Consistency:	white powder
pH-value:	9,8 (1 % solution)
Bulk weight :	128 oz/gal

Ingredients (according EU-recommendation):

Oxygen-based bleaching agents over 30 %; anionic surfactants less than 5 %; enzymes

Additional Ingredients:

Bleaching activators, fragrances

Recommended Dosage:

Indication: fl. oz per 10 lb dry laundry, bath ratio: 1 : 4

Hardness Range ppm CaCO ₃	1-Bath-Procedure	2-Bath-Procedure	
		1 st Bath	Bleach Bath
0 - 250	1.5 fl.oz		0.5 – 2.3 fl.oz
over 250	Water to be softened		

ATTENTION:

Please refer to the textile care instructions by the textile manufacturers.

The information provided herein is given on an advisory basis which does not imply any liability on our part. For further details **see our relevant safety data sheet prior to use !**

Application:

For very efficient use as highly active, caring stain-removal salt for addition to all our wash detergents, especially **Multibrite** and **Megapur Star**. Add to the detergent in the dosing chamber of the main wash cycle or fill into a dosing ball.

Properties:

Removal of pigment soil	n.a.
Removal of grease-bound soil	☺ ☺ ☺ ☺
Removal of albuminous soil	☺ ☺ ☺ ☺ ☺
Bleaching action	☺ ☺ ☺ ☺ ☺
Graying inhibition	☺ ☺ ☺
