

Neutrol L

Liquid product for solvent care and maintenance

Neutrol L is an alkaline liquid, soluble in solvent, which due to its high acid binding capacity, neutralizes acid decomposition products that are formed in the distillation process. The substances contained in **Neutrol L** can also bind unpleasant odors, thus contributing to a better odor of the garments being processed.

Neutrol L reduces the danger of metal corrosion, ensures perfect distillation and keeps the distilled solvent neutral and stable.

Application:

Neutrol L is added directly to the still after thorough cleaning by hand or automatic device. The standard concentration for perchloroethylene equipment is:

Dosage: 0.4 - 0.7 ozs of **Neutrol L**
per 10 lbs machine capacity

Overdosing has no detrimental effect.

By permanent checks of the **pH-value** of the contact water from the water separator, the effectiveness can be evaluated.

HEALTH AND SAFETY RECOMMENDATIONS:

Precautions: Irritating to skin and eyes. Keep out of the reach of children. When using do not eat or drink. Avoid contact with skin. Avoid contact with eyes. Wear suitable gloves and eye/face protection.

First Aid: In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. After contact with skin, take off immediately all clothing and wash immediately with plenty of water. In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible). If swallowed, seek medical advice immediately and show this container or label.
