

V 1

Pre- and post-spotting agent for use in perchloroethylene

V1 solubilizes paint, lacquer, adhesives, smear, ballpoint pen, tar, nail polish, lipstick, ink and similar grease-bound stains.

Application:

Apply V 1 on the stain and treat with a soft brush. In case of aged stains or stains difficult to remove, let react longer time. Frequently remoisten the stained area to intensify the solubilizing power.

In pre-spotting, rinse in the drycleaning machine and, on the post-spotting table, rinse with water or steam.

ATTENTION:

- V 1 may damage the dyes of acetate fiber fabrics.
- Do not use on coatings or laminations as this might cause damages.
- In case of sensitive textiles, dyes and prints, we recommend to try the product reaction on the seam prior to spotting.
- Do not intermix spotting agents.

HEALTH AND SAFETY RECOMMENDATIONS: Flammable.

Precautions: Risk of serious damage to eyes. Keep out of the reach of children. When using, do not eat or drink. Avoid contact with skin and eyes. Wear suitable gloves and eye/face protection. Vapors may cause drowsiness and dizziness. Do not breathe vapor.

First Aid: Do not breathe fumes/aerosol. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. After contact with skin, take off immediately all contaminated clothing and wash immediately with plenty of water. In case of accident or if you feel ill, seek medical advice immediately (show the label when possible). If swallowed, seek medical advice immediately and show this container or label.

ONLY TO BE USED BY PROFESSIONAL DRYCLEANERS !
